DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Howard Bernstein on 5/31/2005.

The application has been amended as follows:

- a) Regarding claim 2, on line 8, change word: "impluse" to – impulse --.
- b) Regarding claim 2, on line 15, add word: -- combined – after word: "new".

Allowable Subject Matter

- 2. Claims 1-6 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggest a delayed decision feedback sequence estimation diversity receiver comprising: transmission path estimators for respectively obtaining transmission path impulse response sequences from a plurality of reception signals received through a plurality of antennas; delayed wave detectors for respectively detecting components having the largest amplitudes from delayed wave component sequences in impulse response sequences as output signals from the transmission path estimators; a first delayed wave canceller for outputting a new impulse response

sequence obtained by combining the output signals from the transmission path estimators while canceling delayed wave components having the largest amplitudes on the basis of the output signals from the delayed wave detectors; an estimation region detector for detecting a timing for signal estimation from the new combined impulse response sequence and outputting a timing signal; a second delayed wave canceller for receiving the output signals from the delayed wave detectors and outputting a new reception signal obtained by combining the reception signals while canceling delayed wave components having the largest amplitudes; and a delayed decision feedback sequence estimator for performing signal estimation upon receiving the new combined reception signal, the new combined impulse response sequence, and the timing signal output from estimation region detector, and outputting the estimation result.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
